

Success Story

How our invoicing and digital signing solution helped a renowned energy drink company reduce manual labour by 60%

Overview

A renowned energy drink company faced challenges with their ERP system, particularly in printing invoices with e-Invoice QR codes and sending digitally signed copies to customers. They needed to comply with regulations while generating daily MIS reports to track the status of e-Invoices and e-Way bills. To address these issues, Cygnet implemented a compliance platform with API integration for E-Invoicing and DSC signing.

Business Challenge

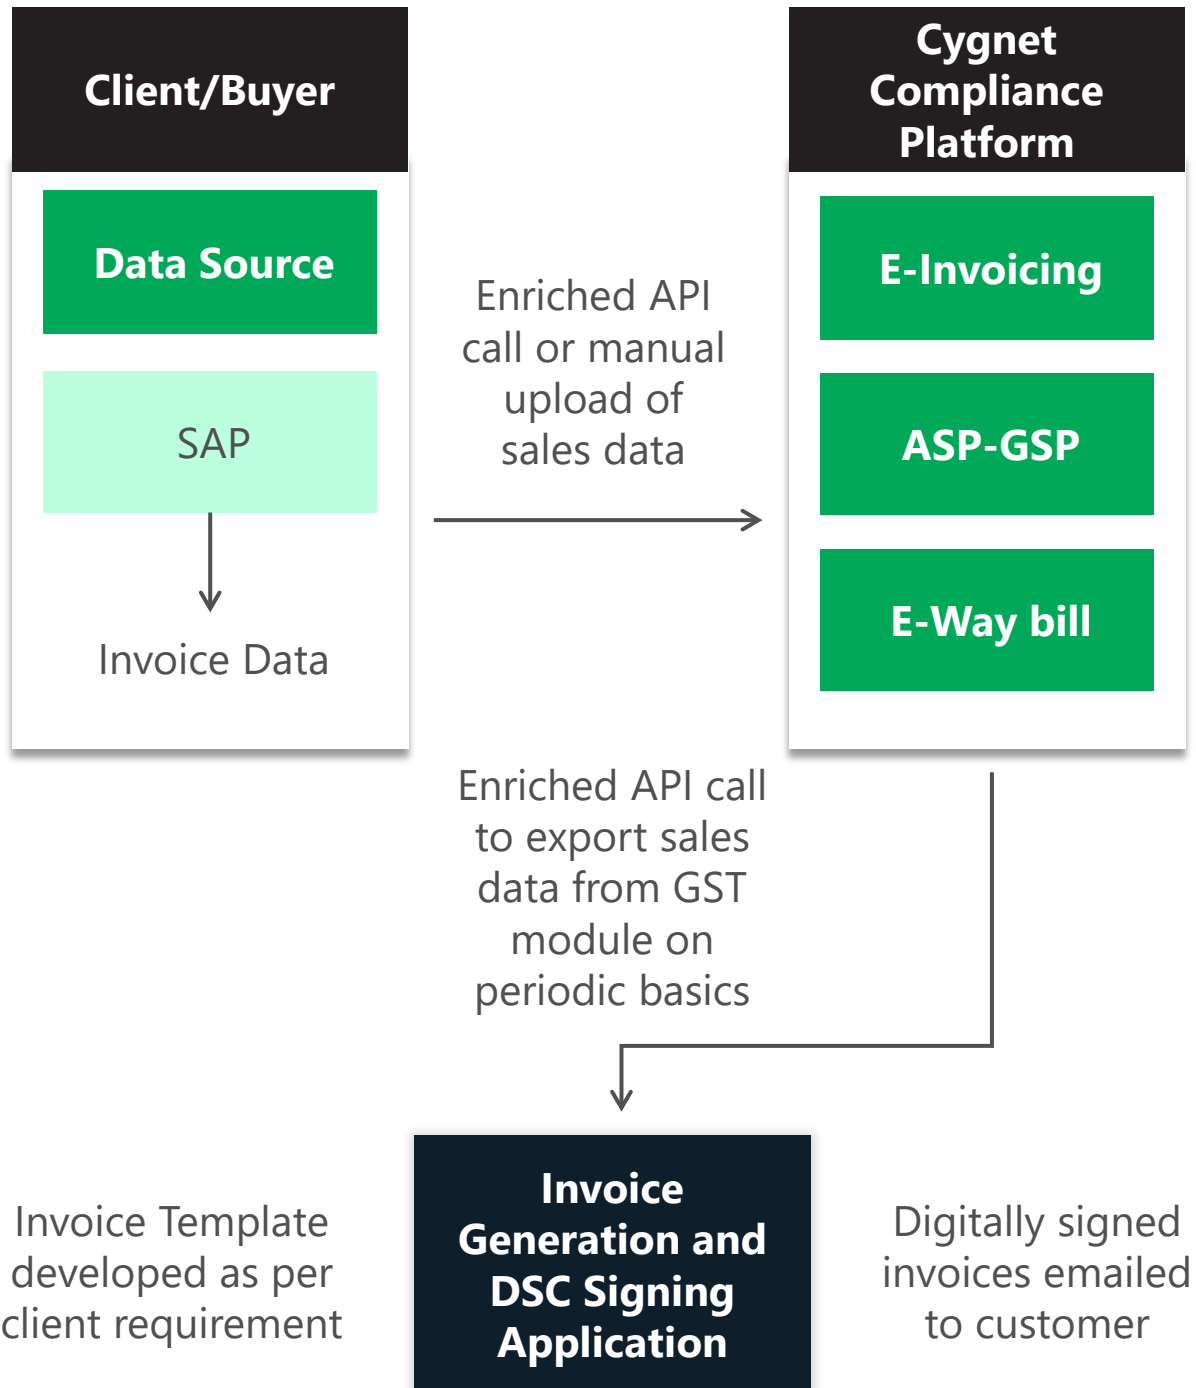

- Client's reluctance to make changes in ERP, mainly related to reverse integration, was not allowed by the global ERP team. As a result, they face a slew of additional challenges in meeting their requirements for:
 1. Printing invoices with e-Invoice QR cod
 2. Sending digitally signed copies of invoices to multiple customers as per compliance.
- Daily MIS reports tracking the status of E-Invoices and e-Way bills.

Our Solution

- Cygnet's compliance platform's API integration with E-Invoicing and DSC Signing Solution was made available.
- The DSC signing application synchronizes data received from the client's system into Cygnet's Compliance platform every two minutes on a regular basis.
- Addition of identifier flags for several invoice templates, customer code, email addresses, etc.
- Invoice template creation as per the requirements of the client.
- Sending digitally signed e-Invoices and e-Way bill copies to the customers over email.
- Generating daily MIS reports that display the status of individual e-Invoices and e-Way bills and the status of digital signing.
